DAW Molded Plastic Armchair Wooden Dowel Base

The welded Eiffel base and organically shaped polypropylene plastic shell were completely new structural forms in the industry when they were designed, resulting in one of the first industrially manufactured plastic chairs of the mid-century modern era. The now iconic design includes a high flexible back, deep seat, and waterfall edge. This variation of the classic armchair features solid wood legs with high grade stainless steel hardware.

Details

This premium Rove Concepts reproduction features:
